

Swivel and visitor chairs quarterback

Generously proportioned ...

Generously proportioned and elegant – the Sedus *quarterback* is an office swivel chair which promises plenty of space for productive well-being at the very first glance. With its particularly high backrest, the *quarterback* provides great support, whether working on a concentrated task, or for a more mobile work force.

... stylish and elegant.

But not just the generous backrest of the *quarterback* is convincing – with its dynamic lines, its striking silhouette and a wide range of feature and colour variants it also sets clear accents stylistically. A chair full of character you'll be happy to confide in: Sedus *quarterback*.

Clean lines for lightness and dynamics in the office.

Comfortable, spacious and yet with remarkable lightness – the Sedus *quarterback* combines timeless design with perfect ergonomics. The armrests striving towards the front underline the dynamic expression of the side line and highlight the high level of seating comfort. A quality that is complemented by sophisticated technology and individual customisation options. All three types of upholstery to choose from for the backrest not only support the back, but also enhance the elegant appearance.

Basic armrests. Height-adjustable.

3D adjustable armrests. Adjustable height, width and depth, with Softtouch finish.

Polished connection to go with polished aluminium base.

Sitting healthy can be so comfortable. Height-adjustable lumbar support with mesh and slim upholstered versions.

Height- and depthadjustable lumbar support with mesh and slim upholstered versions.

Height-adjustable lumbar support, integrated into the backrest of the fully upholstered version.

More relaxed working. The height and tilt adjustable neck support with optional clothes hanger.

Intuitive operation. The controls are ergonomically arranged and bear clear function symbols which make adjusting the seat height and angle and the backrest quick and simple.

Optimal thigh support. With 380 mm seat depth and seat depth adjustment of up to 60 mm, the *quarterback* offers ideal prerequisites for ensuring your thighs sit just right, no matter what size your are. Individually adjustable. The seat tilt can be adjusted by four degrees, allowing a slightly forward leaning seat position adjusted to personal needs. **Greater comfort.** The large castors are ideal for any type of floor covering.

Comfortable team.

Every top performer needs a good team. This is why the representative *quarterback* swivel chair is accompanied by four-leg models with or without castors and by cantilever chairs. They all take up the style elements of the *quarterback* family and thus demonstrate their commitment to comfort and ergonomics. This is particularly evident in the typical backrests: they are as wide as the swivel chair, and available in the same types of upholstery. But aesthetically too, the four-leg model and the cantilever chair are on a par with the rest of the *quarterback* family: the design combines lightness and dynamics, and was honoured with the Red Dot Award.

Mesh backrest

The innovative 3D membrane allows light to shine through, creates an open impression in the room, and nevertheless protects the user's back from unwelcome gazes.

Slim upholstery

The slim upholstery emphasises the *quarterback's* dynamic lines and is proof that sitting comfort is not about the thickness of the upholstery.

Full upholstery

In this version, the quarterback offers all the comfort of an upholstered model – yet the integrated membrane creates a particularly slim-line effect.

Uniquely diverse.

Colours, cover fabrics, frame variants – an almost infinite number of possible combinations await you. Which *quarterback* is yours? Try yourself: www.sedus.com/en/ quarterback

Sustainability down to the last detail.

At Sedus, sustainability and quality "Made in Germany" have formed part of our key corporate principles for more than 50 years. Principles which are united in Sedus *quarterback* and which are reflected in its recycling-oriented product design, ecologically tested materials, resourceefficient manufacturing demonstrating energy awareness and ongoing quality tests. For example, instead of a conventional paint finish, a solvent-free powder coating is used on *quarterback*. State-of-the-art and extremely environmentally friendly electroplating, in which all production residues containing metal are recycled, is also part of Sedus' quality and sustainability philosophy.

Around the world, Sedus adheres to the principles of the UN Global Compact for human rights, labour standards, the environment and anti-corruption.

Fully assembled

Reduction of volume

Global Reporting Initiative™

Partially assembled

Less shipping volume.

Optionally the quarterback swivel chair is delivered partially assembled with an intelligent packaging concept. For larger quantities this ensures significantly reduced transport costs and protects the environment with lower CO₂ emissions.
